

PLATINUM WHEELGUARD

A **BETTER SOLUTION** against tire and rim theft

What is the better solution?

PLATINUM
WHEELGUARD

OR

Locking Wheel Nuts

Deterrent Effect?

A police traceable ID code is affixed on each of the vehicle's rims. The ID code is registered in a national database.
Warning Decals are affixed to the front driver and passenger windows, identifying that the vehicle's wheels are traceable.

Requires a unique key to unlock. Determined or experienced thieves (or a person with automotive knowledge) can easily remove locking wheel nuts, even without the key!

Installation?

Easy installation. No special tools required.

Mechanic must install. Nuts are required to be torqued to specific safety specification.

Appearance?

Does not alter the look of your wheels.

Often doesn't match the vehicle's rims. Material can rust, chip, pit, or corrode.

What Happens if Wheels are Stolen?

If a claim is approved under your primary insurance policy, Platinum WheelGuard will reimburse up to \$5,000 towards your comprehensive deductible.

If the locking wheel nuts fail to prevent theft, the manufacturer does NOT provide any assistance.

Term

3, 4, 5, or 6 year plan terms available. If no claims are made, the guarantee can be renewed for another term.

No term or time limit.

Upgrade Options

Storage Coverage - We'll match your home insurance deductible up to \$1,000 if the tires/rims are stolen from secure storage.

Towing Assistance - We'll reimburse receipted towing expenses on a covered claim, up to a max of \$100.

Rental Assistance - We'll reimburse receipted expenses for a rental vehicle on a covered claim, up to \$50/day for up to 3 days.

Trip Interruption - We'll reimburse receipted expenses for hotel and/or meals up to \$100/day, for up to 3 days, if more than 150km from your residence and the vehicle is required to stay at a repair facility overnight.

None.

Customer Satisfaction

You will never need to deal with the frustrations associated with locking wheel nuts, but will have comfort knowing you are protected against loss.

From lost to stripped keys, added labour charges, and replacement costs, locking wheel nuts have frustrated more customers than they have satisfied.
